José Andrés Ramírez Olvera

Software Development Coordinator

jandresrmz@yahoo.com || +522228117255 || Languages: Native Spanish, English B1, German A2 || LinkedIn || Portfolio

PROFESSIONAL SUMMARY

Software Development Coordinator with 25+ years' experience across automotive, manufacturing, and chemical analysis. Leads development of two production LIMS for ISO/IEC 17025 accredited petroleum and water laboratories, plus CRM, geospatial prospecting, KPI, and internal operations systems. Builds full-stack solutions with PHP (CodeIgniter), C#/.NET 10 (Blazor), and TypeScript (NestJS, React, Angular) on SQL Server. Integrates LLMs (OpenAI, Gemini) for regulatory compliance checks and practices AI-assisted development with Clean Architecture, ADRs, and automated testing.

CORE SKILLS

- Software Architecture: Layered / Clean Architecture
- LIMS, CRM & ERP Integration
- Regulatory Rules as Code (ISO/IEC 17025, NOM-016-CRE, NOM-001-SEMARNAT)
- LLM Integration for Compliance Validation
- KPI Dashboards & Andon Systems
- Audit Trails & Data Traceability
- Geospatial Applications
- Technical Team Leadership & Code Review
- Requirements, PRD & ADR Documentation
- On-Premise Deployment & Server Administration

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript, PHP, SQL (T-SQL), HTML5, CSS3, Google Apps Script, VBA

Backend: .NET 10 (ASP.NET Core, Blazor Server, EF Core, Identity, Background Services), NestJS (TypeORM), Node.js, Express, CodeIgniter 3, Laravel (Basic)

Frontend: React, Angular, Next.js, SvelteKit, MudBlazor, Tailwind CSS, Bootstrap, jQuery/Ajax

Mobile & Desktop: Capacitor (Android), Electron

Databases: SQL Server, PostgreSQL, SQLite / Cloudflare D1, FoxPro DBF (legacy ERP integration)

AI & LLM: OpenAI API, Google Gemini API, structured JSON prompting, Claude Code, MCP

APIs & Integrations: Microsoft Graph (Azure AD, OAuth2), Google Maps Platform (Maps, Places, Geocoding, Directions), Firmamex e-signature, WhatsApp (whatsapp-web.js), Socket.IO

Geospatial: GeoJSON, Turf.js, Leaflet, Mapbox GL

Reporting: PhpSpreadsheet, mPDF, TCPDF, PDFKit, ECharts, Chart.js, QR codes and barcodes

Testing: xUnit, Jest, Vitest

DevOps & Hosting: Git, GitLab (CI, merge requests), GitHub, Docker / Docker Compose, PM2, Windows Services, Cloudflare Workers

Methodologies: Layered Architecture (Domain, Application, Infrastructure, Presentation), Clean Architecture, MVC, SOLID, ADRs, Scrum, ISO/IEC 17025

Other: SAP, Microsoft Dynamics, WordPress, Advanced Excel

PROFESSIONAL EXPERIENCE

Software Development Coordinator

PETROAADLAB SA de CV – Puebla, Mexico September 2023 – Present

- Lead development of two production LIMS for ISO/IEC 17025 accredited petroleum and water laboratories (PHP/CodeIgniter, SQL Server, 58 controllers).
- Built an MVP that checks lab reports with an LLM (OpenAI / Gemini, structured JSON output) against NOM-016-CRE-2016 limits and the analyst accreditation matrix before release; next phase moves it to a locally hosted LLM.
- Delivered to production a meeting-room booking system with a tablet kiosk, built on a 4-layer Clean Architecture (.NET 10, Blazor, EF Core, Microsoft Graph, GitLab CI) and running as a Windows Service.
- Developing an ISO/IEC 17025 KPI system (44 KPIs) on .NET 10 with a 4-layer Clean Architecture (Domain, Application, Infrastructure, Web), 18 ADRs, unit tests, and an automatic calculation worker that reads the LIMS databases.
- Built GEO LEADS, a geospatial prospecting module embedded in the LIMS CRM (NestJS, React, Google Maps/Places, Turf.js), in production with a SQL cache that reduces Google API calls.

- Rebuilt the CRM leads pipeline: relational activity history, lead–client–quote linking with automatic closing, reassignment, and Excel import/export.
- Built an enterprise KPI and Andon module and lab, logistics, sales, and upskilling dashboards (e-signature compliance, calibration compliance, capture-error rate, on-time delivery).
- Extended the ticketing system to record the root cause and person responsible for capture errors, with metrics and cross-department tickets.
- Implemented an operational-change audit trail (old/new values, mandatory reason), order versioning, and an order tracker whose every lookup is logged.
- Encoded regulatory rules as code: accreditation, approval, and subcontracting scope per service; client permit conditions under NOM-001-SEMARNAT-2021; external-lab chain of custody.
- Automated billing reconciliation between legacy ERP (FoxPro DBF) invoices and quotes, including automatic invoice numbering.
- Built a WhatsApp group logger (Node.js, PostgreSQL) that classifies friction between orders and the LIMS and generates PDF reports.
- Developed AquaadlabLog, a field-sampling app for the water lab (Angular, Capacitor Android, Electron, Mapbox), and the corporate website on Next.js.
- Lead a team of 3 developers, coordinating the HR system (NestJS, Angular) and the purchase-requisitions microservice (NestJS) through GitLab feature branches and merge reviews; author PRDs, ADRs, user manuals, and technical-debt reports.

Warehouse and Planning Assistant

RIOSUL – Puebla, Mexico September 2016 – January 2023

- Managed materials, data analysis, and documentation with full FIFO compliance.
- Handled supplier reconciliation, quality control, and production scheduling.
- Negotiated disposal of obsolete materials.
- Supported continuous improvement and operational projects.

Production Facilitator / Information & Electronic Repairs Specialist

Volkswagen de México – Puebla, Mexico September 1994 – June 2015

- Managed production information and developed executive KPI presentations for management.
- Led project implementations and managed economic recovery processes related to third-party impacts.
- Achieved first place in economic recovery performance in 2008 and 2009.
- Trained and developed the electrical-electronic team, achieving 100% workforce certification.

PERSONAL PROJECTS

- Multi-event digital invitation engine: SvelteKit, Cloudflare Workers, D1, Drizzle ORM, Vitest (in progress).
- XV-años invitation with a guest-pass admin panel, QR passes, and seating map; in production on Cloudflare Workers with a Google Apps Script backend.

EDUCATION

Full Stack Web Development & Computer Science: Academlo – January 2023 to June 2023

Bachelor's degree in business administration (Incomplete): BUAP – August 2009 to July 2013

Computer Technician: Instituto Alba Edison – August 1999 to July 2001

LANGUAGES

Spanish: Native | English: B1 (Technical reading and ongoing studies) | German: A2

COURSES & CERTIFICATIONS

C# and ASP.NET Core (Blazor, EF Core, Clean Architecture) | Svelte & SvelteKit (in progress) | Angular Pro | n8n – Advanced Automation | Docker for Developers | Next.js & Modern Frontend | Technological Project Management | Leadership and Management Skills

INNOVATION & EMERGING PRACTICES

- AI-assisted development with Claude Code and OpenCode (MCP, agent instructions) for prototyping, PRDs, and code review.
- AI-mentored, module-based learning applied to production projects in .NET/C# and SvelteKit.
- LLM integration for regulatory validation (OpenAI, Gemini).

AVAILABILITY

Willing to Travel: Yes | Preferred Work Mode: Hybrid / Remote | Relocation: Open, depending on offer
